

FIG. 174.—Numerous Gram-positive round-ended rods between muscle fibers. Numerous muscle fibers are dissolved and replaced by collections of gas. Others show fine bubbles in the act of producing this change. There is a moderate amount of gas between muscle bundles. The majority of the bacteria are found just within the sarcolemma. Accession number 2879, Army Medical Museum. Negative number 46046. MacCallum stain; $\times 350$
