

FIG. 207.—Section from the gangrenous muscles. Three of the fibers in the center of the picture are swollen to four or five times their normal diameter. Some of the fibers have lost their markings, while adjacent ones still retain them. There is one group of short Gram-positive bacilli in the field and numerous Gram-negative organisms scattered throughout. Accession number 4708, Army Medical Museum. Negative number 46236. MacCallum stain;  $\times 750$
