

FIG. 210.—Left arm with a debrided bullet wound at the level of a fracture of the humerus, with rupture of the brachial vessels. The dissected tissues show an advanced putrefactive gangrene with blackening, blistering, and desquamation of the skin. Midsection of the arm at this level shows autolyzed muscles around an area of putrefactive gangrene. Accession number 2903, Army Medical Museum. Negative number 32348
