

FIG. 264.—Section from the emphysematous area of gangrene in the biceps muscle, which shows a marked alteration in reaction of the muscle fibers to the basic dye. Portions of the myomeres in some of them appear jet black from the intensity of staining with crystal violet and basic fuchsin. Accession number 2891, Army Medical Museum. Negative number 46039. MacCallum stain; $\times 300$
