

FIG. 310.—Field from the putrefactive gangrenous area with a beginning gaseous process. It shows a slight leucocytic reaction, some laking of muscle fibers, and in the lower left-hand corner a fiber containing a small gas bubble in its center. There is little chemical change. Accession number 4705, Army Medical Museum. Negative number 46235. Hematoxylin and eosin stain; $\times 195$
