

FIG. 61.—Organization complete in an alveolus, with fibers extending to a mass of cells in the atrium into which the alveolus opens. The cells are mononuclear, some of which have phagocytosed pigment. This type of organizing tissue shows few reticulum fibers and much collagen. Accession number 22673A, Army Medical Museum. Negative number 45439. Hematoxylin and eosin stain; $\times 340$
