

Dogs and monkeys are killed by approximately the same doses. Expressed as fatal concentrations relative to that for the dog, the following results were obtained for different species:

	Dog	Cat	Rat	Goat	Rab- bit	Mon- key	Guinea pig
Fatal concentration, percentage of dose fatal to dog.....	100	220	220	220	400	135	33
Toxicity of $\text{As}(\text{C}_6\text{H}_5)_2\text{Cl}$, different species, reciprocal of above..	100	45	45	45	25	75	300
