

TABLE 7.—Series of fatal cases coming to autopsy by groups and by the gas believed to have been cause of lesions found

Type of gas	Group				Total of each gas	Percentage of total cases
	A	B	C	D		
Yellow cross.....		373	67	23	463	84.80
Green cross.....	¹ 33	² 2	3	2	40	7.33
Yellow and green cross.....		12	1		13	2.38
No conclusion.....		7	2	21	30	5.49
Total in each group.....	33	394	73	46	546	
Percentage of total cases.....	6.04	72.16	13.37			100.00

¹ Phosgene, diphosgene, chloropicrin, ethyldichlorarsine, and perhaps a rare instance of an extremely heavy concentration of mustard-gas vapor.

² Pneumonia a sequel.
