

TABLE 11.—Number of cases ¹ and attack rates of malaria in the U.S. Army, worldwide and Latin America, by type of Plasmodium and year, 1942-45—Continued

Type of <i>Plasmodium</i> and year of admission	Worldwide		Latin America	
	Number	Rate	Number	Rate
Mixed malarial infections:				
1942-----	216	0. 07	127	1. 25
1943-----	1, 193	. 17	29	. 24
1944-----	1, 150	. 15	5	. 06
1945-----	885	. 12	-----	0
Total	3, 444	0. 14	161	0. 42
Other and unspecified forms of malaria:				
1942-----	7, 013	2. 16	381	3. 74
1943-----	52, 469	7. 64	209	1. 73
1944-----	23, 470	3. 01	45	. 52
1945-----	11, 470	1. 54	10	. 14
Total-----	94, 422	3. 73	645	1. 70

¹ Consists of new admissions and readmissions for malaria as well as secondary cases in which admission was for other causes, but in which malaria existed concurrently or developed subsequently.
