Attached regiments.....	644	437	2	1,083

Source: (1) Compilation by Fifth Army Casualty Section. (2) Theater ETMD Rpt for Jul 45. Totals for the 92d Division are from the ETMD. Figures for the attached regiments—the 442d and 473d—are calculated. Wounded in action figures for the 442d and 473d Regiments given by Goodman, *Fragment of Victory*, page 217, are respectively 513 and 571 for the period 5 April–2 May inclusive, or 1,084 in all, compared with 1,083 arrived at by calculation. Since there was no combat action prior to 5 April or after 2 May the time periods may be taken as comparable for purposes of recording wounded in action.
