

TABLE II.—RELATIONSHIP OF PLASMA PROTEIN CONCENTRATION, HEMATOCRIT VALUE, AND TYPE OF WOUND TO BLOOD LOSS IN PATIENTS WHO HAD RECEIVED 1 UNIT OR LESS OF PLASMA

Blood Volume	Loss of Less than 30 Percent			Loss of 30 Percent or More		
	Peripheral (10 cases)	Non-peripheral ¹ (17 cases)	All Types (27 cases)	Peripheral (8 cases)	Non-peripheral ¹ (4 cases)	All Types (12 cases)
Average Plasma Protein Concentration ² (Gm. per 100 cc.)	6.4±0.1	6.5±0.1	6.5±0.1	6.0±0.1	6.4	6.1±0.1
Average Hematocrit Value ² (cc. cells in 100 cc.)	39.0±1.7	43.0±1.0	41.5±1.0	35.0±1.3	37.8	36.0±1.1

¹ Abdominal, thoracic, and thoraco-abdominal.

² Determinations made on hospital admission.
