

TABLE 70.—AVERAGE PLASMA VOLUME INCREASE* IN 19 PATIENTS WITH FATAL RENAL INSUFFICIENCY

All Cases (19 Cases)		Group A (15 Cases)		Group B (4 Cases)	
Plasma Volume Increase <i>percent</i>	Postoperative Days	Plasma Volume Increase <i>percent</i>	Postoperative Days	Plasma Volume Increase <i>percent</i>	Postoperative Days
41.6±6.6	4.8±0.4	46.9±6.6	4.8±0.5	21.8	4.8

*Percent increase, uncorrected, over calculated normal plasma volume.

Group A: Patients who received on the average 1 liter or more of fluid (intravenous colloid and crystalloid) per day.

Group B: Patients who received on the average less than 1 liter of fluid (intravenous colloid and crystalloid) per day.
