

CHART 35.—Average plasma levels of chloroquine (176 patients) during and after treatment under plans A, B, and C

1 Total dose : 1.0 gm. ; duration : 1 day.

2 Total dose : 1.5 gm. ; duration : 4 days.

3 Total dose : 2.0 gm. ; duration : 7 days.

NOTE.—In all schedules, the mean plasma levels during treatment are from 7 to 20 times above the required therapeutic level. Note also the persistence of the drug long after termination of treatment.
