¹ Basic data, unless otherwise specified, from successive issues of "Progress Report," Headquarters, European Theater of Operations, U.S. Army.

² Comprehends all persons assigned or attached to the command.

³ Includes both assigned and attached personnel, but not personnel in headquarters installations, except prior to 30 April 1943, when personnel in base section headquarters may be included. Data, thus, are not strictly comparable to data pertaining to general Services of Supply or Communications Zone strength or net strength, since both of these include headquarters personnel.

⁴ Includes all personnel assigned or attached to the command except nonoperating personnel for the period after 30 April 1943. The nonoperating personnel comprised replacements and members of detachments of patients and prisoners. An "in transit" group is included in the nonoperating category for the period beginning with 30 June 1944; this included patients en route to the United Kingdom from the European Continent and replacements en route to units. To what extent nonoperating personnel entered into the statistics prior to May 1943 is not known.

⁵ From "Strength of the Army" for dates shown or approximations thereto with the following exceptions: 30 April 1944, from source shown in table 31, footnote 3; February-March 1944, obtained by prorating on the basis of data for January and April 1944; 30 June 1944 equals average of data for 31 May and 31 July 1944.
